

The "Do Not Call List" in NJ is one of the most revolutionary steps taken for the improvement of citizens daily lives. I believe there are plenty of other outlets for places to conduct their business without disrupting the privacy of our lives. Numerous surveys have been done on the success of telemarketing prior to this law taking affect. Most of them showed that it was not cost effective since the telemarketing business was down more then 50%. If I need a subscription to NY Times or to find a better phone plan, I am an educated enough consumer to find this information on my own! The majority of us do not need these calls during the most inapropriate time. Please protect the quality of lives of your citizens and strengthen this law in the state of New Jersey!
